A visual communications company &
complete supplier of signage and advertising solutions

Our main market is Scandinavia and Estonia,
but we have long experience with deliveries
of signage and advertising solutions all over
Europe .

With more than 15 000+ sign deliveries to small
and big clients in both public and private sector,
we have developed a solid knowledge base and
experience on how we can successfully expose
our clients brand.

We strive to be market leading on accessibility,
quality, service and to be able to deliver compe-
titive prices for our clients.

**Our job is to make your brand visible –

Facade signs

Signage Garden can deliver facade signs in all shapes and sizes, with or without lighting. In co-operation with you as client we will find the solutions that promotes your brand in the best possible way.

In picking the best possible solutions, there is several factors that play a part. The architecture of the building, the shape and placement of the sign and light conditions of the environment and building. All these factors plays a part on how the final sign will meet up to your expectations.

Facade cover

Signage Garden has produced and delivered standard looking and special 3D facades cover panels. Signage Garden has assembled and delivered majority of the new stores for Rema 1000.

Indoor signage

Signage Garden offers all types of indoor signage, with and without lighting. We ensure that your business provides good information and good referrals for both guests and customers. Your brand should also be well visible and stand out in an indoor environment.

Comprehensive visual communication is important to ensure that your business profile is easily recognizable. Design and presentation of logo and profile in an indoor environment should therefore match outdoor signage to build on the identity of the company. Profile and presentation on the web is also important to give customers and other stakeholders a perception value and a comprehensive impression of the business. We look at the whole and work closely with design agencies, architects and you as a customer to help ensure the visible expression and identity of your business.

Indoor signage also has practical aspects. Indoor signage shall contribute to good and visible information in addition to providing intuitive and good references to the building's facilities. A further aspect of indoor signage is the imposed signage of fire extinguishing equipment and reference to escape routes.

Do your business want a non-binding offer for easy indoor signage or complete signage for the building? Contact us for an informal meeting and exploration of your premises.

LET'S MEAT

Vinyl & Print

Signage Garden offers all types of vinyl and print. Vinyl wrapping is a cheap and efficient way to profile your business or product on cars and shop windows etc. Printing on exciting materials like aluminum and brushed steel can give the room exactly what you are looking for.

Vinyl is very suitable for signage, profiling and decor. Vinyl is available in all thicknesses, colors and lengths and can be printed or laser-cut in all fonts or designs. With Vinyl it's just the imagination that stops what's possible to create.

We print logos and design elements on all types of materials, give us a challenge and we will do our utmost to realize your wishes.

Exhibition

Signage Garden can design complete trade fair stands for your business in different materials, offering all types of decorative items.

To be visible at major conferences and fairs, one must stand out from the crowd. To make you visible in rooms where there are a lot of people and struggle for attention, one must be creative in terms of design, color choices and choice of materials.

We use various materials to create both small and large decorative elements for offices, fairs, events and window displays. How about decorating the Christmas exhibition in the store with a full-grown snowman, or a giant gift package? Or what about creating an exclusive logo sign in isopor with lacquered acrylic in front to get a piano paint effect?

We gladly assist your business with decorating a trade show, Christmas exhibition or event so it creates attention and contributes to the positive attention for your business.

Event

We have worked with several of the largest event companies in Scandinavia and have good experience of making the impossible, possible. We can assist with everything from idea development to the actual production of profile and design elements.

Making a good event is often about surprise the participants and create a moment that will be remembered and talked about for a long time after the event itself. We work closely with the event company and you as a customer to ensure that the design of the event is as expected, and preferably a little more ...
